Don't Merely "Stop" a Cough

Stop the Thing that Causes It
and the Cough will
Stop itself

A cough is really one of our best friends. It warns us that there is inflammation or obstruction in a dangerous place. Therefore, when you get a bad cough don't proceed to dose yourself with a lot of drugs that merely "stop" the cough temporarily by deadening the throat nerves. Treat the cause—heat the inflamed membranes. Here is a home-made remedy that gets right at the cause and will make an obstinate cough vanish more quickly than you ever thought possible.

Put 2½ ounces of Pinex (50 cents worth) in a pint bottle and fill the bottle with plain granulated sugar syrup. This gives you a full pint of the most pleasant and effective cough remedy ever used, at a cost of only 54 cents. No bother to prepare. Full directions with Pinex.

It heats the inflamed membranes so gently and promptly that you wonder how it does it. Also loosens a dry, hoarse or tight cough and stops the formation of phlegm in the throat and bronchial tubes, thus ending the persistent loose cough.

Pinex is a highly concentrated compound of Norway pine extract, rich in guaiacol, and is famous the world over for its healing effect on the membranes.

To avoid disappointment, ask your druggist for "2½ ounces of Pinex," and don't accept anything else. A guarantee of absolute satisfaction, or money promptly refunded, goes with this preparation. The Pinex Co., Ft. Wayne, Ind.

FRENCH WAR PRESS IS WELL HOUSED

All Transactions Between Government and Representatives of the Press Done There, Excepting the Censorship of News

Paris, March 9.—The "Maison de la Presse" or the "Home of the Press" is the name given to an elegant new apartment building in the Rue Francaise that now shelters the war press service of France. All transactions between the government and representatives of the press, local and foreign, are done there, excepting the censorship of news. The service has been installed in these more commodious quarters in order to bring about more satisfactory relations between the press and the government and between the press and the army.

Though the news censorship is kept apart, the war files are shown there for the first time and examined by the military authorities. Everything else concerning the publicity and propaganda of the war is centered there, including the photographic service. There are separate departments for the French press and for the foreign press with commodious waiting rooms and work rooms for journalists; there is a department on diplomatic information and a department on military information, the former subsidiary to the foreign office and the latter to the war office; it is there the war correspondent must go for the rare and persistently sought permit to approach the field of military operations.

Correspondents' permits are given out in batches of six or less at a time, and there are about two trips of a maximum of four days each every month on the average. Since there are upwards of a hundred or more regular American and English newspaper correspondents waiting their turn, to say nothing of authors, artists, intermittent and special writers of all kinds, with a considerable number of Italian, Spanish, Russian, Swedish, South American, Norwegian, and Swiss correspondents, it is a great school of patience to the ardent journalist.

The period of waiting is not devoid of heartburnings for the correspondent who was here "before the war" and has held the fort ever since. He often sees a "special" man who arrived in the morning going out with a party to the front

SENDING GUNS TO MANILA

Ordnance and Supplies Are Loading on Buford at New York

MAY BEGIN REGULAR SERVICE

A New Submarine Battery Inquiry Is Coming Soon

Washington, D. C., March 9.—Ordnance and military supplies to complete defenses of Manila are being loaded on the transport Buford at New York, and war department activities in this direction are indicated by announcement that the Buford may regularly sail between San Francisco and Manila after this trip. Elsewhere the nation's defense activities continue. On the Maine coast the new destroyer Porter yesterday morning went out for her trials. A special board is to conduct tests of submarine batteries using the E-2, scene of the recent explosion, as laboratory. Meanwhile, Mr. Edison's published catalogue, containing what are in naval circles considered indiscreet details, is causing discussion. Among other items of interest is announcement of the Sheepshead bay naval and military tournament beginning on May 20.

BLAMES CHURCHILL FOR THE DREAD-NOUGHT DELAY

Balfour Says Former Sea Lord Took Big Guns for Monitors Instead of Putting Them on Capital Ships.

London, March 9.—Delay in completing dreadnoughts was due to the fact that Col. Churchill, former sea lord, had used guns and gun mountings designed to complete their equipment for monitors, A. J. Balfour, first lord of the admiralty, told the House yesterday in replying to the attack by his predecessor on the present regime and Mr. Balfour also asserted that it was under the Churchill administration that skilled shipwrights had been permitted to join the army.

U. S. CROPS ON FARMS MARCH 1

Government Reports Show 241,717,000 Bushels of Wheat and 1,138,773,000 Bushels of Corn.

Washington, March 9.—Owing to the heavy export of wheat and corn since the last harvest season, much interest centered in yesterday's department of agriculture monthly report announcing the amount of wheat of last year's record crop remaining on farms March 1. The department's crop reporting board, from reports of its correspondents and agents throughout the country, estimates the amount of wheat, corn, oats, and barley on farms, with comparisons of preceding years, the proportion of each crop which will be shipped out of the country where grown, and the percentage of the 1915 crop crop, which was of merchantable quality, as follows:

Wheat: About 241,717,000 bushels, or 23.9 per cent of the 1914 crop remained on farms March 1, 1916, compared with 132,903,000 bushels or 17.2 per cent of the 1914 crop on farms March 1, 1915, 151,795,000 bushels, or 19.9 per cent of the 1913 crop remaining in 1914, and 156,483,000 bushels, or 21.4 per cent of the 1912 crop remaining in 1913.

About 67.7 per cent of the 1915 crop will be shipped out of the country where grown, against 60.7 per cent of the 1914 crop so shipped, and 53.9 per cent of the 1913 crop so shipped, and 61.6 per cent of the 1912 crop so shipped.

Corn: About 1,138,773,000 bushels, or 37.3 per cent of the crop remained on farms March 1, 1916, compared with 910,894,000 bushels, or 34.1 per cent of the 1914 crop on farms March 1, 1915, 886,352,000 bushels, or 35.4 per cent of the 1913 crop in 1914, and 1,289,655,000 bushels, or 41.3 per cent of the 1912 crop in 1913.

About 18.6 per cent of the 1914 crop will be shipped out of the country where grown against 18.6 per cent of the 1914 crop so shipped, 17.2 per cent of the 1913 crop so shipped, and 21.8 per cent of the 1912 crop so shipped.

CONGRESS MUDDLING DEFENSE MEASURES

Five Committees and Everything in Confusion, Says Senator Newlands.

Washington, March 9.—Senator Newlands of Nevada in the Senate yesterday predicted that the present Congress would fail to evolve a practical system of national defense and charged both the Senate and House with pursuing "most inefficient methods in undertaking the great problem."

"Five separate committees, two in the Senate and three in the House, are investigating the subject," he said, "and the witnesses are rushing from one to the other repeating their stories in the greatest confusion."

"Instead of considering the problem as a unit, we will be involved in the utmost confusion in the contentions of the different committees for the detached portions of their bills when the subject comes before us."

HAIR COMING OUT?

Dandruff causes a feverish irritation of the scalp, the hair roots shrink, loosen, and then the hair comes out fast. To stop falling hair at once and rid the scalp of every particle of dandruff, get a 25-cent bottle of Dandurine at any drug store, pour a little in your hand and rub it into the scalp. After a few applications, the hair stops coming out, and you can't find any dandruff. Adm.

Topics of the Home and Household.

A good substitute for button molds is stiff pasteboard, cut to the required size. Pad the top with cotton and cover.

Take the bric-a-brac and other "knick-knacks" from the mantels and cabinets during the hot weather and save yourself the trouble of dusting them every day.

Laundry a roll of white pieces and keep them for patching lingerie waists and underclothing. If new material is put in for a patch it will shrink, and the garment will have a puckered effect. In such a roll keep pieces of different qualities, all of which have been washed and ironed.

Jellied Apples—Pare and slice enough tart apples to fill a baking dish. Sprinkle each layer with two tablespoons of granulated sugar; when the dish is full press the apples under a weight, then add half a cup of cold water, cover closely and bake an hour or longer. Chill and turn from the dish before serving.

When a person is ill and it is your task to prepare their food, when serving food, cut it into tiny squares, drop a poached egg on top and it will be much easier for the invalid to eat. It is always hard work to cut toast with a fork while lying in bed.

Varied Ways of Serving Potatoes.

Potatoes are better liked if cooked each day in a different manner, and to do this is really not difficult.

For serving with chicken, the following recipe gives a dainty dish: Season the freshly boiled white potatoes and mash them, then press through the potato ricer into the serving dish; place in a quick oven and bake to a light brown. The ordinary baked potato may be varied by serving on the half shell. When the potatoes are baked to a turn, slice off the top. Take out all the insides, mash and mix with the following ingredients (the proportions are for six potatoes): Two tablespoons of butter, three tablespoons of hot milk, the whites of two eggs, beaten. Beat the mixture.

GET IT FIRST—NOT LAST

When a cold grips your system it is convincing proof that your condition is weakened—remember that. It is risky indeed to simply trust your strength to throw it off, because neglected colds have brought more serious sickness than any other one thing, while weakening cathartics and stimulating syrups are often depressing and dangerous. The one best treatment for any cold—the one so often relied on when others fail, is the powerful blood-nourishment in Scott's Emulsion, which feeds the very sources of bodily strength to suppress the present cold and generate strength to thwart further sickness. Get Scott's first, not last—and insist on the genuine—always free from alcohol and injurious drugs.

Scott & Bowne, Bloomfield, N. J.

BRIGGS' Mentholated Hoarhound COUGH DROPS

A SURE AND QUICK RELIEF for hoarseness and throat irritations, pleasant to the taste and wonderfully effective. Soothes the throat and gives immediate relief. Everywhere 5 cents.

C. A. Briggs Confectionery Co., Cambridge, Mass.

Resinol Soap

a friend to tender skins

Many ill-made toilet soaps contain free alkali, a harsh chemical which tends to dry and injure the skin or irritate. Resinol Soap contains absolutely no free alkali, and it is added the soothing, healing Resinol medication, which doctors have used for over 20 years in treating skin troubles. Thus it comforts tender skins, and helps nature clear the complexion and keep the hair rich, lustrous and free from dandruff. Sold at all druggists and toilet counters.

BELL-AN'S
Absolutely Removes Indigestion. One package proves it. 25c at all druggists.

WILSON'S SUPREME WISH IS TO AVOID WAR

Senator Stone in Senate Makes This Declaration After Conference with President.

Washington, March 9.—Senator Stone of Missouri, chairman of the foreign relations committee, declared in the Senate yesterday after a conference with President Wilson Tuesday night, "that so far from the president desiring to involve this country in this disastrous European war, his supreme wish is to avoid that calamity."

Chairman Stone announced that he would not deliver the address to the Senate that he has had in preparation for some time with regard to foreign issues. He said he would make a brief statement in the Senate later.

No News.

"Did you ask little Jimmy Wombat about the fight over at his house the other night?"

"Yes."

"And what did you get out of him?"

"Not very much. His mother is evidently an exceedingly strict censor."

Kind Gentlemen—Well, little girl, do! Santa got your stocking!

Little Girl—No, I wasn't Santa, it's eugenics. Ohio Sun Dial.
